We are here.

Office

## BUSSINESS SCOPE

Neepoints Commercial Ltd has been engaged in the fashion footwear industry since its inception in 2013. Our services cover the entire products development, mass production and trade cycle. We support any brands from initial design to prototyping sample, from mass production to quality control, from shipping to after-sales service.

## ABOUT US

Since its inception, NeePoints has proven to be one of the best quality footwear companies in Guangzhou. We have extensive factory resources in China and Vietnam. We also has closed working relationships with experienced and reliable factories. The timely and effective communication ability of the NeePoints team provides customers with quality footwear and fashion products at affordable prices.

# ABOUT US

Guangzhou own the most complete shoe material market in China. We often select different kinds of fashionable new materials and soles from various material markets in Guangzhou for designers of various brands, and deliver them to customers in time for their brand design. Then we do the prototyping sample work in our own sample manufacturing workshop in Jinjiang Shoe Industrial Zone. Our sample workshop is not only for sample making. We also set up a special production line there to produce some small quantity orders. This line is dedicated to producing small but high quality standard orders for the early established brands. This production line is staffed with the most skilled workers and sample making masters.
